

(Provision of Offshore Environment, Health, Safety and Security Services)

### 1. Background

Tullow Ghana Ltd has a need for Provision of Offshore Environment, Health, Safety and Security Services.

### 2. Summary of Scope of Work

The scope covers the following areas:

- A. Executing offshore security and field response plans, policies, and strategies in the following areas:
  - **Navigational Safety** – to manage access to the oilfield gateways, monitor and track the complicated traffic environment to avoid collision and allision among offshore assets, and provide the appropriate navigational safety information.
  - **Maritime security** – coordinating the operational patrol of the EHSS vessel in the detection, deterrence and interdiction of marine vessels/crafts that are observed to approach or transit TGL operational areas as a preventative measure against security risk (piracy, hijacking, robbery, hostage-taking, terrorism).
  - **Fishing Risk Mitigation** – coordinating the patrol of the EHSS vessel to detect, notify, deter and interdict canoes and their streamed gears that are observed to incur the designated Area-To-Be-Avoided (ATBA) of the FPSOs and rigs and operational safety zones around other support vessels.
  - **Emergency Response** (e.g., Oil Spill response, Search & Rescue)– “First Responder” role to provide initial emergency response and support to all offshore assets, search and rescue in case of personnel man overboard/helicopter ditch, and Tier 1 offshore oil spill containment capability for TGL.
  - **Ad-hoc support activities** e.g. as an alternate to aviation MEDEVAC, support for offtake and flaring activities
- B. Ensuring TGL Health and Safety Policy and Rules are embraced and maintained during all aspects of offshore EHSS operations including the “STOP” safety observation cycle.
- C. Monitoring and strongly advocating compliance with Voluntary Principles on Security and Human Rights.

# Tullow Ghana Limited
