Primary Line of Business: Hardware and Software Procurement, LAN / WAN / VPN, Structured Cabling, Server Room Design, IT Policies Planning, Office Setup / Relocation, Cloud Computing, IT Training, Busy Accounting Software, Managed Document Solution.

Company Overview: Power City network has been established as a leader in high quality and Modern Technology. Since its founding in Accra Ghana, West Africa in April 2011, Power City Network has worked to develop comprehensive technological solutions to businesses and consumers globally.

Ranging from software and hardware procurement to IT training we stand tall in delivering high quality products and services to all our clients.

Our latest technologies has improved the quality and value of all our clients for over three years. Power City Network has become a company of choice in the Technology Industry.

We have invested portions of our assets in the research of Future Technology Development, Innovation, Security and Product Development to keep us competitive on the global market.

Company Strategy:

Purpose: To be a leader in Modern Technology both in Software and Hardware with key emphasis on High-Performance and Security.

Vision: To be a pioneer in current and emerging technology by engaging people with exactly what they need, at exactly the right time, no matter the location.

Mission: At the center of Power City Network our mission is to provide High-Performance, Current and Modern Technology needs to businesses and consumers globally by deploying Top class ICT solutions that exceed the needs of individuals and organizations, both nationally and internationally.

Core Value:

Availability, Acceleration and Security:

- Availability – ensuring that our services are reliably accessible regardless of user, device type, location or connectivity and bridging the accessibility gap.
- Acceleration – improving our products and services with extremely high-performance application and modern tools.
- Security – delivering a range of security features that ensure our clients assets and systems are safe at all times

Goals

- Global expansion in the field of Technology both hardware and software.
- Increase the assets and investments of the company to support the development of our products and services
- To build good reputation in the field of Technology a key player in the industry.

Scope of Work

We offer a wide variety of solutions for industries:
