RE: Pinnacle Engineering
Ai 19, Community 8
Tema-Ghana

Dear Sir/Madam,

LETTER OF RECOMMENDATION

I would like to thank Pinnacle Engineering Co. Ltd. for being one of our most professional and dependable partners in our work. We've successfully worked with Pinnacle Engineering for some few years now and there are only few companies that we have that solid relationship with and it's due to the integrity and commitment of its engineering staff.

No mechanical or fabrication challenge seem overwhelming and even when the going gets tough, they have a strong metal ability and commitment to make sure challenges are solved and on record time.

We are happy to recommend them for any partnership you may require to have with them. No matter what the project is in their area of operation, Pinnacle Engineering has always been there to investigate and provide quality products, solutions and services.

If your company needs any further recommendations, we would be more than happy to serve as a reference.

Yours faithfully,

VOLTIC [GH] LIMITED

PHILIP WELLINGTON

[TECHNICAL MANAGER]
