

1. Background

There is a need to charter a Platform Supply Vessel (PSV) to primarily serve as a Bunker Vessel to receive and store Marine Gas Oil (MGO) from Suppliers' Tankers and transfer the MGO to TGL-contracted vessels, FPSOs and Drilling Rigs in support of the Bunkering works

2. Summary of Scope of Work

- Capability to load & discharge MGO both midships and at or near the stern
- Capable of operating 24/7 in DP-2 mode to deliver the scope of work
- Adequate vessel crewing to safely deliver contracted service provision
- Utilisation of FRC / MOB boat in support of offshore emergency response (MOB etc)
- Other tasks normally associated with a vessel of her size, capability and type in the offshore oil & gas sector, but always within the vessel's design intent and capability

3. Contract Duration

- 1 to 2 years with options
