

Tullow Ghana Limited

SCOPE OF WORK

(Rental of Chemical Warehouse Facility)

1. Background

Tullow Ghana Limited (TGL) requires a facility for chemical storage in Takoradi.

2. Summary of Scope of Work

TGL would require a 1000m² purpose-built facility for chemical storage in Takoradi. The facility should have the following features

- Impermeable concrete floor
- Fully bunded
- Well ventilated and adequately lighted
- Sheltered area providing protection from the elements
- Electrical equipment with ATEX rating
- Adequate room to allow for segregation of hazards
- Fire detection and alarm system
- Dousing system
- Large area for container offloading
- Good road access to site and;
- Proximity to the port to minimize risk of transporting hazardous goods.

The chosen supplier should also have trucks that would be able to transport the chemicals from the facility to the Commercial Port. Vendor would be responsible for managing the facility, responsible for all remedial works and be required to manage their own security and lighting and produce monthly reports on the status of chemicals.

3. Contract Duration 2 years firm plus 3x1 year options
